All the Nutrients Your
Cat Needs ...
the Way Nature Intended!

Item # 405006
6.6 lb. Bag
Retail: \$15.95
Autoship: \$13.50

Item # 405016
16.5 lb. Bag
Retail: \$36.95
Autoship: \$31.50

100% Complete & Balanced Nutrition:

Your cat relies on you for its health, happiness and well-being. One of the most important decisions you can make for your cat or kitten is to feed it a high quality pet food, rich in the fundamental nutrients it needs to maintain vitality and good health.

Scientifically formulated by Dr. Jane Bicks, a veterinarian recognized nationally as a foremost authority in the natural treatment of animals. Life's Abundance™ uses only fresh, natural, wholesome ingredients designed to provide 100% complete nutrition in accordance with AAFCO feeding protocols.

This new generation cat food provides antioxidants, phytochemicals and other health promoting compounds not previously found in processed cat foods. Each ingredient in Life's Abundance™ was carefully selected to work in harmony with the others to provide the optimal nutrition for your cat. It is the **ONLY** cat food on the market today that uses ActiVin™ grape seed extract from a patented process to ensure your cat receives the maximum benefit from this superior antioxidant.

Why is Life's Abundance™ Better for My Cat?

Life's Abundance™ contains **NO** by-products. Meat by-products can include portions of animals such as necks, feet, undeveloped eggs and intestines.

Life's Abundance™ contains **NO** artificial colors, flavors or chemical preservatives. Our premium formula is preserved with natural mixed tocopherols (vitamin E) and not BHA, BHT or ethoxyquin, which many professionals consider harmful to animals.

Life's Abundance™ contains **5** high quality **ANIMAL** protein sources and **NO** corn, wheat or dairy. Cats are obligate carnivores ... which means meat is absolutely necessary in their diet. Many cat food manufacturers use cereal, such as corn or wheat, as their main protein source. Life's Abundance™ uses 5 animal proteins: chicken meal, egg, herring meal, chicken liver meal and turkey meal, all derived from human-grade processing plants.

Our high quality **chicken** meal is made from dried whole chicken meat and skin. Removing the water and moisture from the chicken provides a more concentrated form of protein. **Egg**, a complete protein, is one of the most digestible forms of protein and contains many nutrients including vitamins A, B, E, K, biotin, sulfur and amino acids...all needed for cell growth. **Fish Meal**, another high quality protein source, is rich in Omega-3 Fatty Acids, great for the health of your cat's skin & coat and overall well-being. **Chicken Liver Meal**, in addition to being an excellent source of protein, is rich in taurine and provides your cat with vitamin A, needed for healthy bones, vision and skin, as well as a host of other nutrients. Cats need liver because they can't convert beta-carotene from vegetables into vitamin A like dogs and humans can. **Turkey Meal** is a very digestible form of protein.

Life's Abundance™ is **nutrient dense with vitamins, minerals, fats, essential fatty acids and taurine** for your cat's healthy heart and eyes. Many of the nutrients used in our cat food come from natural whole food sources just as Mother Nature intended. Whole foods, like alfalfa sprouts and wheat grass, also supply flavonoids and other important phytochemicals which have become the new frontier in the nutritional sciences. We've also added ActiVin™ grape seed extract, one of the finest and most potent antioxidants known today.

Life's Abundance™ uses **chelated minerals** because a proper balance of minerals is essential for good health and chelated minerals are more easily absorbed than non-chelated.

Life's Abundance™ contains **five probiotics**, such as Lactobacillus Acidophilus, which help promote a healthy digestive tract by maintaining the delicate balance of friendly bacteria in your cat's intestines. This is important because the digestive tract is the barrier between whatever your cat eats and its blood stream. Probiotics also help keep stools regular.

Pet Owners Say

Our cat Tyrone is normally very finicky. I put a bowl of Life's Abundance cat food down next to his regular food. He went right to your cat food and has been eating it ever since!

Thanks, your cat food is great!

P.R., Lake Worth, FL

Life's Abundance™ Premium Health Food for Cats

What ingredients does the cat food contain?

Chicken Meal, Ground Brown Rice, Chicken Fat (Preserved with Natural Mixed Tocopherols (Vitamin E)) Dried Beet Pulp, Egg Product, Herring Meal, Brewers Dried Yeast, Chicken Liver Meal, Flax Seed Meal, Fish Oil, Turkey Meal, Lecithin, Potassium Chloride, Lactobacillus acidophilus fermentation product, Lactobacillus casei fermentation product, Bifido bacterium bifidium fermentation product, Streptococcus faecium fermentation product, Aspergillus oryzae fermentation product, Alfalfa Sprouts, Wheat Grass, D/L Methionine, L-Lysine, Taurine, Calcium Carbonate, Ascorbic Acid, Grape Seed Extract, Rosemary, Vitamin E Supplement, Niacin Supplement, Biotin, Thiamine Mononitrate, Pyridoxine Hydrochloride, Vitamin A Acetate, Riboflavin Supplement, d-Calcium Pantothenate, Vitamin B12 Supplement, Citric Acid, Menadione Dimethylpyrimidinol Bisulfate (Source of Vitamin K Activity), Vitamin D3 Supplement, Folic Acid, Ferrous Sulfate, Zinc Sulfate, Zinc Proteininate, Iron Proteininate, Zinc Oxide, Copper Sulfate, Manganese Sulfate, Manganese Proteininate, Copper Proteininate, Manganous Oxide, Sodium Selenite, Calcium Iodate.

Crude Fat, not less than21.0%
Crude Fiber, not more than 3.0%
Moisture, not more than10.0%
Ash, not more than 6.5%

Calorie Content: 470 kcals/cup (ME - metabolizable energy)

How can I be sure my cat is getting the nutrition it needs?

Life's Abundance™ is scientifically formulated by a leading veterinarian and nutritionist to provide the optimal nutritional value, palatability and digestibility for your cats health and overall well-being. Animal feeding tests using the Association of American Feed Control Officials' (AAFCO) procedures substantiate that Life's Abundance™ Premium Health Food for Cats provides complete and balanced nutrition for all life stages.

How much do I feed my cat per day?

Feed your cat the suggested amount of Life's Abundance™ per day. Use the following chart as a guideline and adjust as needed for your cat's age and activity level. Keep fresh drinking water available at all times.

Weight of Cat (lbs.)	Suggested Daily Feeding Amount
3 to 6	1/4 to 1/3 cup
7 to 12	1/3 to 1/2 cup
13 to 18	1/2 to 3/4 cup

You will find your cat needs to eat less of Life's Abundance™ Premium Cat Food than most supermarket brands. That's because Life's Abundance is more nutrient dense and doesn't contain the cereal & fillers found in other cat foods.

How should I switch my cat off its current food?

When switching from another cat food, make the transition gradually to help avoid digestive problems which can result from an abrupt change. Over a 4 to 5 day period, gradually add more Life's Abundance™ and less of the previous food until the transition is complete.

Will my cat develop urinary problems with this dry cat food?

No. Studies now show that urinary tract disease (FLUTD) is not caused by the percentage of ash (the minerals) in the food. However, urinary tract disease is caused by basic urine which is typically produced when a cat's diet is too high in cereals. Unlike many cat food brands that use cereal as a protein source, our food maintains your cat's natural acidic balance for urinary tract health because it's rich in five animal protein sources; chicken meal, whole egg, herring meal, chicken liver meal and turkey meal. It's the **natural** choice if you are concerned about your cat's urinary tract health.

What is ActiVin™ and why have you added it to the cat food?

ActiVin™ is a powerful antioxidant derived from grape seed extract. More than 60 research presentations, publications and abstracts have reported on the exciting health benefits of ActiVin™. Studies prove ActiVin™ contains some of the most powerful antioxidants yet discovered ... far more potent than vitamins C, E and beta-carotene! ActiVin™ is extracted from premium quality red grape seeds by a patented water extraction process. This patented process ensures the extract contains a greater amount and a wider range of the NATURAL antioxidant properties from this important ingredient. Most other grape seed extracts use potentially dangerous chemicals which can leave residues and strip away many of the nutrients that the ActiVin™ process retains. Not only is ActiVin™ safe and healthful to consume, it's environmentally friendly to produce. No toxic chemicals are flushed down the drain and unlike pycnogenol, no trees are cut down for their bark.

Why are antioxidants important for my cat?

Antioxidants defend us against dangerous free radicals which can destroy cell membranes and damage DNA. Free radicals are continually being produced by your cat's body as part of its normal aging process. Your cat is also exposed to external sources such as second hand smoke, pesticides, pollution, excess sunlight, which also produce free radicals. Scientists believe that free radicals may be a root cause of more than 60 chronic and degenerative diseases, including certain types of cancer, arthritis, cataracts and heart disease, as well as the aging process itself.
